Ikkonsidrat,

1. Mix-xhieda moghtija u mill-istqarrijiet li inghataw skond il-ligi jirrizulta li fil-15 ta' Lulju 1999 wara nof in-nhar, Frans Cuschieri iltaqa ma' Paul Kavanagh li kellu jaghtih ghaxar liri Maltija (LM10) prezz ta' droga. Dawn gew fl-idejn. Kavanagh kellu xi giehi zghar u tqatta l-flok ta' Cuschieri. Kavanagh mar sab kenn għand l-akkuzat li hu habib tieghu u jigi minnu. L-akkuzat u Kavanagh marru għand Cuschieri fejn tlewwmu bil-kliem, imbagħad telqu. Jista' jkun li wara Cuschieri mar wara l-bieb ta' l-akkuzat u zgassah billi kien dghajjef. Hemmhekk l-akkuzat qabad senter, tefa fih skartocc wiehed u flimkien ma' Kavanagh mar wara Cuschieri li kien telaq u spara fuqu. Cuschieri seta kellhu xi hadida fil-karrozza imma f'li gara la deheret u wisq anqas intuzat. Wara l-isparatura l-akkuzat mar id-dar flimkien ma' Kavanagh u halla s-senter hemm. Tkellmu u l-akkuzat mar I-Ghassa jirraporta x'gara. Wara mess is-senter ix-xhud Pace. Cuschieri garrab feriti hfief.

L-akkuzat uza s-senter tal-marka Luigi Franchi bin-numru tas-serje AH06653 f'post abitat, wara li kkargah bi skartocc. Għal dik is-sena l-licenzja ma thallsitx.

Ma gewx ikkawzati hsarat fil-propjeta tax-xhud Harvey kif xehdet hijha stess.

2. Inkiser il-bon ordni imma din il-kontravenzjoni (338 (d) (d)) hi aassorbita fid-delitt principali.

Fin-nota tieghu tat-18 ta' Dicembru 2000 l-Avukat Generali deherlu li mill-Kumpilazzjoni tista' tinstab htija taht l-artikoli li gejjin

Art 41 (1) (a) tal-Kapitolu 9:- Fuq it-tentattiv ta' reat
(1) kull minn bil-hsieb li jaghmel delitt juri dan il-hsieb b'atti esterni u jaghti bidu ghall-esekuzzjoni tad-delitt, jehel, meta jinstab hati, barra minn meta il-ligi tghid espressament xort'ohra,
(a) jekk id-delitt ma jkunx gie esegwit minhabba xi haga accidental u indipendent mill-volonta tal-hati, l-piena stabbilita għad-delitt ikkunssmat imnaqqsa grad jew zewg gradi.

3. L-abli difensur ta' l-akkuzat issottometta 'inter alia' "illi bl-ebda mod ma jirrizulta attentat ta' feriti gravi anke minhabba in-non idonjeta' ta' l-arma uzata." Fin-noti tieghu Sir Anthony Mamo (Vol. 1 'Criminal Attempts') fisser li:-

"..... the inefficiency of the means in order to exclude criminal liability, must be absolute. Carrara thus makes out the distinction between absolute inefficiency and relative inefficiency, including in the better term the inefficiency or inadequacy or defectiveness of the means. The inefficiency is said to be relative (idoneita' relattiva) when the means were not in themselves capable of completing the intended crime owing to the particular conditions of the person or things against whom or upon which the criminal action was directed, or owing to the exceptional circumstances surrounding the fact, but could well have and could complete that crime if they had been or were used against another person or upon another thing, or if they were accompanied by different circumstances.

On the contrary, the inefficiency is said to be absolute, when the means used could in no circumstances injure

the right sought to be invaded whoever or whichever the person or thing against whom or upon which they were directed. By way of illustrating this distinction, Carrara gives the following examples a burglar wanted to break into a house by forcing open the door thereof, and he dreamed that he could do this by a fragile reed; a man with intent to poison his enemy administered to him some flour believing that it had the effect of a deadly poison, a person, intending to kill another by shooting, thought that he could accomplish his attempt by loading his firearm with a blank cartridge. In these and similar cases the efficiency of the means chosen is absolute, for whichever the door attempted to be broken open by means of that reed, or whoever the person, however weak, sought to be killed by means of that flour or that firearm, the achievement of the wrongful purpose was always impossible. But if instead of a reed the burglar has used an iron lever to which, however, the door, on account of its solidity, did not give way, or if the would be murderer had administered a truly poisonous substance which the strong physique of the intended victim resisted, or has fired the gun loaded with a bullet which, at the shorter distance, could have caused the death of the victim, then in all such cases the inefficiency of the means is not absolute but merely relative, because it is not inherent in the means themselves but arise out of the particular circumstances surrounding the fact.

Where the inefficiency of the means used is absolute, criminal liability for the attempt does not arise

Where the inefficiency of the means used is absolute, criminal liability for the attempt does not arise; and it does not make any difference that the agent may have firmly believed that he could carry out his designs by those meansit is not the intention, however mischievous, that gives rise to liability, but the mischievous tendency of the overt act itself done in pursuance of such intention."

4. Dak li qed tissottometti d-difiza ma jistghax jigi accettat. Dan huwa kaz ta' 'idoneita' relattiva u mhux assoluta kif jirrizulta mix-xhieda ta' l-expert ballistiku (Vol 1, fol. 124).

5. Il-Qorti li semghet ix-xhieda u flietha hi konvinta li l-akkuzat ried jikkaguna hsara fil-gisem ta' Cuschieri u dan mhux biex ibezzgħu jew kif jghid hu 'jbezbizilu'. L-istqarrija ta' l-akkuzat hi cara bizzejjed. L-akkuzat "ried jagħmel wahda sewwa". Dan fortunatament ghall-kullhadd ma garax.
